

### **ABSTRACT OF THE DISCLOSURE**

A master carrier for magnetic transfer used in a transfer method for applying a magnetic field for transfer by bringing a master carrier for magnetic transfer into close contact with a slave medium, the master carrier having a magnetic layer corresponding to a recording information for transfer formed on surface of a substrate, the slave medium serving as a magnetic recording medium where the information is to be transferred, whereby relative permeability of the magnetic layer of the master carrier for magnetic transfer is within the range of 10 - 1000.
